

AYYAPPA BATHURI

AZURE INFRASTRUCTURE/MIGRATIONS

ayyappabathuri@gmail.com

+91 7997295769

Hyderabad, Telangana

Microsoft Certified (AZ-900 and AZ-104) with 3 years of total experience in Azure cloud aiming at a reliable position where my skills can be utilized towards achieving organization goals on various cloud platforms.

PROFESSIONAL SUMMARY:

- ✓ Good Experience in **Azure Infra, Azure Migrations, Azure Monitor.**
- ✓ Experienced in Infrastructure Development, Testing, Maintenance & Monitoring activities.
- ✓ Administering, maintaining, and troubleshooting source code and changing control repositories.
- ✓ Hands-on experience of Source Code Management (Version Control System) tools like Git.
- ✓ Good experience on **Azure DevOps** and **Azure Boards.**
- ✓ Experience in application containerization(microservices) using container technology **Docker** and orchestration platform – **Azure Kubernetes Services.**

PROFESSIONAL EXPERIENCE:

Company	From	To
LTI Mindtree	Mar 2022	Present

TECHNICAL SKILLS:

Cloud	• Azure
Version Control	• GIT, Azure DevOps, Azure Repos
Migrations	• Lift & Shift Migrations
Log Monitoring	• Azure Monitor
Operating System(s)	• Windows, Linux
Container Tools	• Docker, Azure Kubernetes

SCHOLASTIC PROFILE

- ❖ **B.TECH. in Computer Science & Engineering** with **72%** at Vasireddy Venkatadri Institute of Technology (Year of Passing - 2020)

AWARDS, CERTIFICATIONS & RECOGNITIONS

- ✓ AZ-900 Microsoft Azure Fundamentals in DEC-2022.
- ✓ AZ-104 Microsoft Azure Administrator in FEB-2025.

PROJECT PROFILE:

Project: TASMU

Technologies: Azure Infra, Terraform, Lift and Shift Migration

Responsibilities:

- ✓ Repatriation of source server (Azure) to target server (Azure).
- ✓ Performing Pre-Migration activities such as enabling replication, test failover and monitoring health status for Virtual Machines
- ✓ Created PowerShell and Shell script to automate Pre and Post migration activities of verifying the server and other resources information.
- ✓ Running tasks for Installing Mobility agents.
- ✓ Creating Terraform scripts and PowerShell scripts with required parameters and values to deploy the Azure Resources.
- ✓ Fork/clone the repositories from Azure DevOps to local system.
- ✓ Pushing the source code to Azure DevOps by using the git commands
- ✓ Developing CD Pipelines through Azure DevOps.

Project: DHL

Technologies: Azure repos, AKS, Cosmo DB, APIM, Azure pipelines, Azure function app, service bus, App insight.

Responsibilities:

- ✓ Created build and release pipelines (CI/CD) using Azure pipelines for deployment of dotnet based microservices to Azure Kubernetes Services (AKS) and Azure Function Apps.
- ✓ Dockerize the microservice and write manifest files for deployment purposes.
- ✓ Troubleshoot and Resolved build and deployment issues.
- ✓ Worked on kubectl commands to get container logs/events.
- ✓ Created and monitored Azure CosmosDB.
- ✓ Used APIM to expose microservices.
- ✓ Monitoring and troubleshooting with Azure Container insights and Azure Application Insights to fix the issues.
- ✓ Configured Azure Alerts for improvised monitoring.
- ✓ Worked on kubectl commands to get container logs/events.
