Career Objective:

Aspiring for challenging assignments in the field of Python Developer, wish to achieve high career growth through a continuous learning process and prove to be an asset for the organization

Professional Summary:

- Experience of 3 years 6 months working in **Python Development** in **Data Analytics** domain.
- Worked on relational databases like **MySQL**.
- Great knowledge of advanced Python modules like **NUMPY & PANDAS**.
- Experience in creating GUI applications in python using the **PYQT5** module.
- Good exposure in **Requirements, understanding** and analyzing and test plan Document preparation.
- Architecting the **Automated Solutions** from business flow to technical solutions.
- Expertise in **S.D.L.C and S.T.L.C**
- Hands-on experience in defect tracking tools like **JIRA**.
- Have good knowledge of **CORE JAVA**.
- Have good knowledge of **MANUAL TESTING**.

Experience:

- Currently working as a **Python Developer** in **COGNIZANT TECHNOLOGY SOLUTIONS** for the last **3** years 6 months

Education:

- **BTECH | JULY 2022| LOVRLY PROFESSIONAL UNIVERSITY,
PHAGWARA**

Technical Skill Set:		
Operating Systems	:	Windows,
Languages	:	Python, java
Modules	:	NumPy, Pandas
DatabaseTools	:	MySQL, SAP, Power BI
Editors	:	Jupyter Notebook.

Project Profile:

Project 2:

Duration: - Dec 2023 – Till Date

Project Title: Pheonix

Technology: Python, Pandas, NumPy, MySQL, Git,
Matplotlib, openpyxl, API Integration

Roles and responsibilities:

- Extracted large datasets from **MySQL databases** and processed **CSV, Excel, and text files** using Python and Pandas.
- Performed **data cleaning and transformation**, including removing duplicates, handling missing/null values, sorting, filtering, and merging datasets.
- Implemented **VLOOKUP-type logic** in Python to match key columns across different sheets and datasets.
- Automated **Excel report generation** using **openpyxl** and created **basic visualizations** (bar and line charts) using **Matplotlib** to highlight trends.
- Integrated external reference data via APIs and merged it with main datasets to enrich reports; maintained Python scripts in **Git** for version control and tracked changes for updates.
- Maintained Python scripts in **Git** for version control, tracked changes, and applied updates for new requirements.

- Coordinated with SMEs to understand requirements and deliver **accurate, automated, and timely financial reports.**

Project 1:

Duration: - July 2022 – Nov 2023

Project Title: Gemini

Technical Skills:

Python, Pandas, NumPy, SQL(MySQL), Power BI, SAP

Roles and Responsibilities:

- Analyzed SAP-based finance data extracted into Excel and databases, understanding business requirements and preparing data for reporting and analysis.
- Performed data cleaning and transformation using Python (Pandas), handling missing values, duplicates, data type corrections, and merging multiple datasets to create analysis-ready data.
- Executed SQL queries to extract, filter, aggregate, and validate financial data for monthly and ad-hoc reporting.
- Developed interactive Power BI dashboards with key financial KPIs such as Revenue, Cost, Profit, and Margin, using basic DAX measures, filters, and drill-down functionality.
 - Conducted data validation and reconciliation by comparing report outputs with SAP standard reports to ensure accuracy and reliability before sharing with stakeholders.

Personal Profile:

Date of Birth	29-09-1999
Father's Name	Deevireddygari Rajeswara Reddy
Marital Status	Single
Nationality	Indian
Linguistic Repertoire	English, Telugu & Hindi
Address	1/172, Pulimaddi, Nandyal, Kurnool, pin code:518511

Declaration:

I hereby declare that the above written particulars are true to the best of my knowledge and belief.

Place: Bangalore
