Profile

QA Engineer with 4+ years of experience in analyzing requirements, preparing and executing test cases, and debugging issues on web applications. Skilled in manual and automation testing using Java, Selenium WebDriver, and TestNG. Experienced in writing and maintaining automation scripts, performing API testing with Rest-Assured, and ensuring cross-browser compatibility. Proven ability to work in Agile environments and collaborate effectively with stakeholders.

Technical Skills

Testing Expertise: Manual Testing (Functional Testing, Regression Testing, UAT), Automation Testing, API Testing, Performance Testing, Cross-Browser Testing.

Programming & Frameworks: Java, Selenium, WebDriver, TestNG, Cucumber, Page Object Model (POM), MySQL, Rest-Assured, Agile Methodology

Tools: Maven, Jenkins, Git, Postman, AWS, GCP, Selenium Grid, Extent Reports, Swagger, Eclipse, IntelliJ, JMeter, Jira

Professional Experience

04/2023 – present

Senior Associate Consultant, Infosys

Vendor : Apple

Roles & Responsibilities

- Collaborated with cross-functional teams, including stakeholders and developers, to define feature requirements, gather business-critical information, and optimize test coverage by 25%, ensuring alignment with project goals and quality standards, which resulted in 30% faster delivery of features.
- Automated test cases using Selenium WebDriver and Cucumber for BDD, improving test efficiency by 40% and enhancing collaboration between stakeholders and developers, which led to a 20% reduction in overall testing time.
- Created detailed test plans and manual test cases aligned with business requirements and feature documentation, boosting test coverage by 30% and ensuring comprehensive validation of all features.
- Conducted API testing with Rest-Assured to validate RESTful services, increasing API test coverage by 25% and seamlessly integrating with Cucumber for a consistent BDD testing approach.
- Actively participated in daily stand-ups and weekly QA meetings, aligning testing strategies and ensuring smooth communication across cross-functional teams.
- Led cross-browser testing to ensure compatibility across multiple browsers (Chrome, Firefox, Safari, Edge), identifying and resolving 15% more compatibility issues, resulting in a 20% improvement in overall user experience.
- Integrated automated tests into CI/CD pipelines with Jenkins, streamlining the testing process and reducing test execution time by 30%, resulting in faster feedback and quicker release cycles.
- Executed cloud-based testing on AWS and GCP to validate performance and scalability in distributed environments, improving system performance by 25% and ensuring seamless scalability under peak loads.
- Optimized HTML and Extent report generation using Maven, reducing report generation time by 50%, enabling real-time, detailed reporting, and supporting continuous test monitoring.

Technologies & Tools: Java, Selenium, WebDriver, Cucumber, Postman, JUnit, Restful API Testing, Maven, Jenkins, Git, IntelliJ, Cloud Testing(AWS,GCP), Agile Methodology, CI/CD,BDD.

03/2021 – 03/2023

Software Engineer, HCL

Vendor : Kaiser Permanente

Roles & Responsibilities

- Created and implemented automation scripts with Selenium WebDriver, Java, Maven, and the TestNG framework in POM Design Pattern, cutting regression testing time by 35% and ensuring seamless integration with CI/CD processes.
- Demonstrated a strong understanding of the testing lifecycle and defect lifecycle, improving defect tracking efficiency by 20% and ensuring thorough test execution, which contributed to a 15% reduction in post-release defects.
- Performed load and performance testing using JMeter, enhancing system responsiveness by 40% by working closely with the developers to identify and resolve performance bottlenecks.
- Designed and implemented web automation test scenarios for key business processes and use cases, improving automation efficiency by 30% and increasing test coverage by 25%.
- Executed functional, regression, and smoke tests, improving test coverage by 20% and validating the quality and reliability of web applications, leading to a 15% reduction in production issues.
- Tracked defects and reported issues through Jira, collaborating with the development team to prioritize and resolve bugs, reducing defect resolution time by 25% and ensuring timely delivery of releases.
- Actively engaged in an Agile environment, participating in daily stand-ups, sprint planning, and retrospectives to ensure alignment with team objectives and goals.

Technologies & Tools: Java, Selenium, WebDriver, TestNG, JMeter, Eclipse, MySQL, Jenkins, Spring Boot, Jira, GitHub, Agile Methodology, Continuous Integration (CI).

Education

2016 – 2020
Ongole

Bachelor of Technology, QIS College of Engineering & Technology
